## Education

**Indian Institute of Information Technology, Nagpur** 2021 – 2025  
Bachelor of Technology in Computer Science and Engineering CGPA - 8.38

## Relevant Coursework

- Machine Learning
- Deep Learning
- Statistics for AI & DS
- DBMS
- Artificial Intelligence
- Large Language Model
- NLP
- OOPS
- DSA
- Computer Networking
- OS
- Software Engineering

## Work Experience

**Oneture Technologies Pvt. Ltd.** August 2025 – Present  
*AI/ML Engineer*

- Built a Compliance Auditor using Page-Index RAG for clause-level retrieval across large regulatory documents, improving audit accuracy by 40% and reducing latency by 35% via optimized indexing and retrieval pipelines.
- Developed a Supplier Scout Automation Agent for supplier discovery and validation across multiple sources, maintaining a 200K+ suppliers database and improving data acquisition efficiency by 70% through scraping pipelines.
- Engineered a Human to SQL Autonomous Agent for NL to SQL over complex schemas, achieving 90% query accuracy using schema-aware prompting, execution validation, and robust fallback mechanisms for production reliability.
- Built an AI Patent Retrieval Agent to interpret NL queries and fetch the most relevant patents across multiple sources, leveraging semantic search and ranking pipelines to improve retrieval precision and reduce manual research effort.

**Mastersoft ERP Solutions Pvt.Ltd** Jun 2024 – July 2025  
*AI/ML Intern*

- Analyzed a real-world student dataset to identify retention patterns and implemented machine learning and deep learning models (model analysis) to predict student drop-off, achieving a 15% improvement in predictive accuracy.
- Deployed 5+ AI-powered chatbots and autonomous agents, including a FAISS-backed RAG system that improved document-query match accuracy by 35%, enabling inline image parsing and precise extraction from user manuals.
- Engineered a real-time facial recognition attendance system using Flask APIs, deployed it across 8 Dockerized containers with Nginx reverse proxy, achieving 0.1 second response time and achieved 99.2% face match accuracy by using RF.
- Automated content generation using web scraping + Gemini LLMs on AWS, reducing manual workload by 80%, and built a scalable RAG system with caching and automated re-ingestion on AWS S3, cutting retrieval latency by 30%.

## Projects

**Stock Analysis and Prediction** 🔄 March 2024 – April 2024  
*Python, Deep Learning, Statistics, LLM, Time Series Forecasting*

- Built and deployed a hybrid LSTM and ARIMA forecasting model on a stock dataset, with achieving accuracy 70%.
- Engineered and analyzed 4 key indicators (EMA, SMA, RSI, CAMD) to detect momentum and mean-reversion signals, boosting tr forecast stability by 30% and enhancing adaptability to regime shifts and integrated LLM feedback.
- Integrated LLM-driven feedback loop to auto-tune indicator parameters, improving predictive accuracy by 25%.

**Airlytics: Flight Data Analysis Agent** 🔄 March 2024 – April 2024  
*LLM, NLP, Langchain, AI*

- Developed an AI-powered app using dynamic LLM agents to automate end-to-end EDA on flight booking datasets.
- Enabled natural language querying on 100% of cleaned datasets using a Pandas agent, automated statistical analysis and Python code generation, improving data accessibility for non-technical users by 80% and reducing manual analysis.

**Conversational IIITN Chatbot** 🔄 Oct 2024 – Nov 2024  
*AI, Fine Tuning-LLMs, RAG*

- Developed a multilingual chatbot by fine-tuning LLMs and RAG for real-time assistance on the IIITN website.
- Built a scalable, retrieval-based architecture that delivered relevant responses, improving answer precision by 40%.
- Led full cycle development including data scraping, preprocessing, LLM fine-tuning resulting in 60% faster response times and a 3x boost in automated query handling efficiency through detailed model evaluation and iteration.

## License and Certifications

---

- 2023 Amazon ML Summer School — [Link](#)
- 2023 Data Analysis with Python(IBM) — [Link](#)
- 2023 Machine Learning with Python(IBM) — [Link](#)
- 2024 Fundamentals of Deep Learning(NVIDIA) — [Link](#)
- 2024 NLP Applications(NVIDIA) — [Link](#)

## Technical Skills

---

**Languages:** Python, SQL, Java, C/C++, JavaScript, HTML/CSS.

**Frameworks:** Flask, Tensorflow, LangChain, LangGraph, CrewAI, Redis, Pytorch.

**Tools:** Git/GitHub, Postman, CI/CD (GitHub Actions), Google Colab, AWS (EC2, Bedrock & Sagemaker), Docker.

**LLM Systems:** RAG, Vector Search, Embeddings, Prompt Engineering, Execution Accuracy(BLEU, ROUGE & more).

**Databases:** MySQL, FAISS, Pinecone, SQLite.
